

SECURE MESSENGER

The screenshot shows the 'Secure Messenger' application window. At the top, it says 'SECURE MESSENGER' with a green checkmark and 'Ready.' Below this is a large text input field labeled 'Enter your secure message:'. A red button labeled 'Attach File or Folder' is positioned below the input field. Underneath the button, it says 'No attachment selected.' The interface is divided into two columns of input fields. The left column contains: 'Enter Password:', 'Confirm Password:', 'SMTP Server:', and 'Port:'. The right column contains: 'Your Email:', 'Email Password:', 'Recipient Email:', and 'Short Email Message:'. Below these columns is a field for 'Output Filename (no extension):'. At the bottom, there is a red button labeled 'SEND SECURE'.

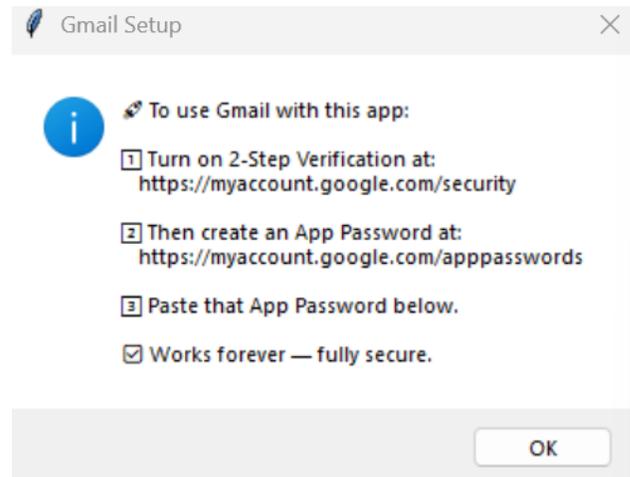

STEP #1 Click attach file or folder and select (only if you have one to send)

STEP #2 First window is for file and if you cancel next window you can choose folder and click select it will show choice below Attach File or Folder button

STEP #3 Enter your message

Step #4 Enter and Confirm Password This will be the password that your recipient of your message will use to open message

Step #5 Enter your email (for this example I used my gmail

and without fail Gmail works flawlessly everytime) you now get this popup Follow steps click OK

STEP #1 Turn on 2-Step Verification at: <https://myaccount.google.com/security>

STEP #2 Then create an App Password at:

You must have Google account Please look it up but this is a start Create & use app passwords

Important: To create an app password, you need 2-Step Verification on your Google Account.

If you use 2-Step-Verification and get a "password incorrect" error when you sign in, you can try to use an app password.

Create and manage your app passwords. You may need to sign in to your Google Account.

If you've set up 2-Step Verification but can't find the option to add an app password, it might be because:

Your Google Account has 2-Step Verification set up only for security keys.
You're logged into a work, school, or another organization account.
Your Google Account has Advanced Protection.

Tip: Usually, you'll need to enter an app password once per app or device.

 To use Gmail with this app:

1 Turn on 2-Step Verification at:

<https://myaccount.google.com/security>

2 Then create an App Password at:

[@gmail.com](https://myaccount.google.com/apppasswords)

3 Copy it password

 To use Outlook:

1 Enable 2FA on your Microsoft Account.

2 Then create an App Password under Security settings.

"@outlook.com" in email or "@hotmail.com" in email:

3 Copy it password

 To use Yahoo:

1 Turn on 2FA in your Yahoo Account. "@yahoo.com" in email

2 Generate an App Password.

3 Copy it password

 To use iCloud:

1 Turn on 2FA for your Apple ID.

② Generate an App Password under Security. "@icloud.com" in email or "@me.com" in email

③ Copy it to password

MY suggestion only and you do what you feel is best for you they all work but I'm telling you Gmail never failed not even once actually none of them failed. I'm basing only on the Massive amounts of testing that was done with Gmail, I trust them

If I'm not explaining well enough please use online search for steps to complete this part

ONCE CREATED : Manually add to Email Password because your standard Email password will not work You must use this step 2FA Password to work This will work Forever and Fully Secure

NOTE: After entering Your Email SMTP Server & Port AUTOFILL there is no need to fill

STEP #6 Add recipient Email

Step #7 Output Filename if you leave blank it use standard secure but if you choose you can add any name you like to personalize This is what your recipient sees

STEP #8 Click Send Secure - Now watch the Magic Happen DONE

You can watch the complete process every step explained and confirmed in the bottom window. Enjoy your privacy no more wondering if anyone on the app server side sees what I'm sending. This Message is created on your PC and sent securely no more wondering. This is Stealth at its best.

TEST ON YOUR Email YOU MUST USE SECURE READER TO UNLOCK WITH PASSWORD

Secure Reader will always be free to download from my website So whoever you send message to have them download Secure Reader (Free) so everyone knows it was never altered or tampered with totally secure just make sure you tell them the password you have chosen so they can read your message and know that 10 failed passwords attempts the message will self destruct That's how we roll Security is our priority never settle for less.

PRIVACY FOR ALL

I EXPECT NOTHING LESS AND NEITHER SHOULD YOU

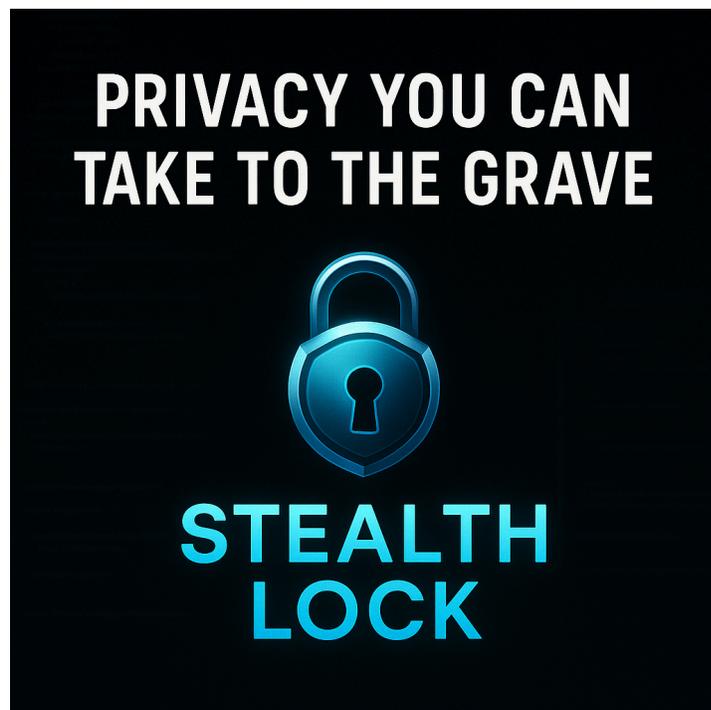

Forever Brothers. Always Unstoppable. Side by Side Edition.

PLEASE TRY NOT TO ABUSE YOUR EMAIL PROVIDER WITH MASSIVE FILES AND IF YOU DO PLEASE TRY NOT TO SEND LARGE FILES OFTEN THEY MAY BLOCK YOU

PLEASE TRY TO STICK WITH MESSAGES UNLESS ABSOLUTELY NECESSARY

NOTE: DURING TESTING I SENT A WHOLE BOOK WITH NO ISSUES BUT LETS NOT ABUSE YOUR EMAIL PROVIDER

YOU NOW HAVE TOTAL CONTROL OVER YOUR OWN PRIVACY AND A TRUE PEACE OF MIND

Privacy is my utmost priority & policy and StealthLock products got your back ALWAYS Unstoppable and Forever100 % !
